About the Recipes....

What do you most want in a recipe? We have tried to make the ones you will find in this book quick, cheap, and easy to make. Although we have written the recipes to be healthy and lower in fat, the foods still taste great!

How do you plan a good meal and stick to a food budget? Try the *Thrifty Week of Menus*. The items that are in **bold and italic** type on the menus have recipes in this book. To make it even easier, we have included a grocery list. According to the dietary guidelines, a family of 2 adults and 2 children should be drinking 4 gallons of milk a week.

Let kids help in the kitchen! Many recipes are marked "KF" for kid friendly. Letting the kids help in the kitchen is a good way to teach them about nutrition. Kids are also more likely to eat foods that they help to prepare. As with any activity, be sure to watch them closely.

BonAppetit!

Food Safety

A few simple rules can keep your family safe from food-related illnesses!

ALWAYS WASH YOUR HANDS! Use soap and warm water. Scrub for at least 20 seconds and rinse well.

Wash your hands after touching raw meats of any kind. Until meat is thoroughly cooked, it has live germs that can make you and your family sick.

Always use clean tools and cutting boards. Wash them well before cutting other foods.

Use a food safety thermometer. You cannot tell if meat is done by looking. Under-cooked meat can cause you to get sick!

Keep raw meat and poultry separate from other foods. Store them in the bottom of the refrigerator to keep juices from dripping onto other items.

Thaw meats, poultry, and fish in the refrigerator- never on the kitchen counter! If you thaw meat in the microwave, cook it immediately.

Refrigerate food as soon as possible after a meal. Food left out for more than 2 hours should be thrown away.

Do not keep leftovers for more than 1 or 2 days. You cannot always trust how leftovers smell so...

WHEN IN DOUBT- THROW IT OUT!

Guidelines for Eating & Activity

Plenty of nutrients within calorie needs - Eat a diet with 2 cups of fruit, 2 $\frac{1}{2}$ cups of vegetables, 3 whole grains, 3 servings of low fat dairy foods, lean sources of protein, and healthy oils. Limit foods with saturated and *trans* fats, cholesterol, added sugars, salt, and alcohol.

Weight management - For a healthy weight, balance the amount of food you eat with the energy you burn each day.

Physical activity - Get moving! Walk or work out for at least 30 minutes daily. This strengthens mind and body and lowers risk for heart disease and other illness. If you need to lose weight, slowly increase the force and lengthen time to 60 - 90 minutes a day. Remember to stretch before exercising!

Alcoholic beverages - If you drink, use good sense and do so in moderation. This means up to one drink per day for women and up to two drinks per day for men. Children and women who are pregnant or nursing babies should not drink at all.

Food safety - Remember the 4 steps: *Clean, Separate, Cook, and Chill.*

Helpful Hints for Thrifty Meals

COOK CHICKEN FOR ALL WEEK!

Buy a 10-lb. bag of chicken legs & thighs. Use a sharp knife to cut the drumstick and thigh apart at the joint. Remove the skin using paper towel.

Debone pieces and freeze to make chicken nuggets next week. Roast a few pieces in the oven for Monday night.

Place the rest of the chicken in a large pot. Add water until chicken is just covered and simmer until tender. When cool, debone the chicken and divide the meat into packages that hold about 1 cup. Refrigerate for up to 2 days or freeze. Use the chicken for sandwiches, chicken salad, chicken and dumplings, chicken tortilla casserole and soups.

Freeze the broth for later, or refrigerate and use it within 2 days. The broth is great for making homemade chicken soup or add it to other soups.

CUT UP VEGETABLES IN ADVANCE!

Clean and cut up broccoli, carrots, and celery on the weekend. Place the vegetables in plastic food bags so they will be ready in a snap. Use them in soups and stews or serve them raw with sandwiches.

Tips to Reduce Sugar

- Try reducing the amount of sugar in recipes by 1/3 to 1/2.
- Use only 100% pure fruit juice.
- Limit juice to about 6 ounces per day.
- Buy canned fruit packed in its own juice.
- Serve graham crackers instead of cookies.
- Cut back on soft drinks. Use plain water, club soda, or calorie-free flavored waters.
- Instead of presweetened cereal, sprinkle plain cereal lightly with sugar or sugar substitute.
- Eat fewer sweets like candy, cake, cookies, and ice cream. Have fruit for dessert and snacks.

Read labels and know what you are buying! Names for added sugars on the ingredients list are as follows:

Sucrose	Corn Sweetener
Dextrose	Honey
Fructose	Levulose
Invert Sugar	Corn syrup
Maltose	Molasses
High Fructose Corn Syrup	

How Much Sugar Is Too Much?

Keep sugars to no more than 10% of your daily calories or about 10 teaspoons or less per day. As with any food, too much sugar can cause weight gain. Risk of health problems is increased if you are too heavy.

<u>Food</u>	<u>Teaspoons/Serving</u>
Fruit Drink (12 oz)	12
Soft Drink (12 oz)	10
Candy bar	7+

Use Leftovers

Save left over green peas for an individual pea salad.

On meatloaf night, cut a slice off before serving and save it for spaghetti night. Add the left-over meatloaf to canned spaghetti sauce for a heartier taste!

Save left over Vegetable Fried Rice to use in Black Beans and Rice on Wednesday or Chicken Rice Soup on Thursday.

Cook It Until It Is Done

Use a food thermometer! Cook foods until the internal temperature is 160° F for hamburger, pork and egg dishes; 145° F for steaks and roasts; 170° F for chicken and turkey breasts and 180° F for whole poultry (insert thermometer into thigh).

Shop Less Often and Save

- Buy in bulk if you can get a better price. Divide into smaller amounts and store in zipper bags.
- If family members eat food that you mean to use later, store non-perishable items in a closet or box away from the kitchen. Bring out only what is needed for today or this week.
- Buy groceries for two or more weeks. Then go to the store weekly to get items like milk and fresh fruits and vegetables.
